City of Madeira Beach Looking into Isolated Street Flooding

MADEIRA BEACH, FL – Public Works crews are looking into reports of isolated street flooding possibly caused by a combination of high tides, heavy rains and clogged storm drains. Crews are also checking on the efficiency of check valves installed in strategic places throughout the community.

Residents are reminded to keep storm drains clear by properly disposing of yard waste and periodically clearing storm drains.

For more information contact Curt Preisser, City of Madeira Beach Public Information Officer at 727-391-9951 x299 or cpreisser@madeirabeachfl.gov.
